Warrenite-Bitulithic Pavement

"A WARRENted Product"

An uncontested championship—

1926 has been a tough year for champions in all fields of sport —hardly one who has risked his crown has held it. But in the pavement field—with competition keener than ever, the old leader still stands supreme. When you have put it to the test, you, too, will appreciate why it has never been surpassed in more than twenty-five years of service.
